

Senior Data Scientist/Analyst

Vendo - Barcelona – 04/2015

Job description

We are looking for a passionate data scientist in touch with industry trends and technologies. You will take part in a fast moving, focused team that is dedicated, hard working and gets results. You should be able to get things done and take ownership of your projects. Self-direction and independent problem solving is a core part of your job.

This position is a long term full time contract. Our team is located all over Europe and United States, and our office is situated in Barcelona, where staff have the option to work from home or the office. The person should be in BCN or willing to move to BCN.

This position will primarily add value to Vendo and its merchants by collecting data, analyzing performance, developing actionable solutions, and presenting recommendations for growth.

Responsibilities

- Collecting and analyzing performance data to answer key questions by developing potential solutions and presenting clear and actionable recommendations
- Working with our dev team to design and develop dynamic applications for optimization and testing
- Designing and creating executive level market research reports
- Setting up performance tests, tracking data, analyzing results, and reporting findings along with recommendations for next steps

Desired Skills and Experience

Requirements

- Strong problem solving skills and detail oriented -- quantitative aptitude a must
- Excellent work ethic, dependable, and responsible
- Inquisitive personality
- Ability to prioritize projects and thrive in a fast paced, multi-tasking environment
- Must have excellent English verbal and written communication skills
- Advanced skills with Microsoft Excel and spreadsheet modeling for business applications
- Experience with SQL and reporting tools
- Experience with optimization and testing in a production environment
- A strong statistical and technical background including:
- Experience and confidence building/developing in R
- Visualization
- Clustering
- Data modeling
- Experiment design
- Experience with large volume data

Qualifications:

- A minimum of 3 years experience as an analyst - data scientist, preferably in E-commerce
- Bachelors or advanced degree in one of the following subjects: Math, Engineering, Business, Computer Science or Economics.

About this company

Follow company

Vendo is a top 250 global online retailer.

We are an analytics company that sells at the point of sale. We develop easy to use tools for pricing, billing, ux and offer management.

We focus on three major areas:

1. Identifying the real differences that exist between individual online shoppers
2. Delivering the right pricing, billing, ux and offers for each shopper
3. Testing and improving

Our easy to use tools, released in 2014, stopped revenue leaks by 10% per shopper.
